EDUCATION

University of Saskatchewan

Bachelor of Science, Computer Science

Saskatoon, SK

Sept. 2017 – June 2020

EXPERIENCE

Intermediate Data Engineer

Apr. 2022 – Present

StellarAlgo

- Saved the organization thousands of dollars in a year by migrating our company data infrastructure from SQL Server to AWS.
- Reduced client on-boarding time from a week to a few hours by developing a toolkit to eliminate multiple manual configuration steps
- Robust Knowledge on data transfer between common warehouses/APIs (Hubspot, S3, Marketo, Snowflake) etc as well as best practices
- Authored and maintained Terraform modules to create reproducible AWS infrastructure
- Performance tuned AWS Glue jobs using Apache Spark to reduce data processing times
- Proposed standard models for assigning products to customers used across all sports teams, improving reporting accuracy across various ticketing systems

Data Developer

Sept. 2020 – Apr. 2022

StellarAlgo

- Developed an AWS/SQL Server ETL pipeline using productized Dynamic SQL stored procedures, eliminating the need for custom scripts per client and decreasing ETL processing time by 35%
- Performed detailed analysis and modelled various datasets (Ticketing, Email, CRM) into star schemas
- Built and improved API integrations (ConstantContact, Mailchimp, Shopify, Tik Tok) using Python and AWS for multiple third-party services

PROJECTS

Fantasy Premier League 2025 | Python, Scikit-learn, Docker, Terraform, Google Cloud

Sept. 2024 – Present

- Developed a bot to automate Fantasy Premier League team selection on a set schedule, hosted on Google Cloud
- Trained an Extra Trees Regression model on previous season data to predict the optimal player pool
- Implemented complete CI/CD pipeline with containerized code deployed as an artifact and triggered via Cloud Run
- Managed Google Cloud infrastructure using Terraform , performance of the model can be found here: kareemseyi.dev

Luxsonic | Unity, C#, NUnit, VR

Sept. 2019 – Dec. 2019

- Built and tested a custom GUI for creating traversable dialogue trees within Unity in VR, achieving 91% code coverage with NUnit
- Designed a custom Unity Editor window for dialogue tree creation/editing and a traceability requirements matrix used by all 8 team members and stakeholders
- Improved dialogue tree traversal time by 35% by implementing a modified Knuth-Morris-Pratt algorithm
- Adhered to test-driven development and CI practices with on-demand builds and weekly code reviews

TECHNICAL SKILLS

Languages: Python, Typescript, SQL, Scala, JavaScript, HTML5, TailwindCSS/SCSS

Frameworks/Tools: Terraform, Docker, Apache Spark/Zeppelin, SQL Server, MongoDB, Node.js, Jupyter Notebook

Cloud/DevOps: AWS, Google Cloud, Snowflake, SQL Server, GitHub Actions, Git, Fivetran
